Motivated and adaptable Computer Science student with a keen focus on software development and cybersecurity. Known for strong communication skills, problem-solving abilities, and a collaborative mindset. Currently building a foundation in Computer Science, with the goal of becoming a proficient full-stack web developer and contributing to innovative projects in the tech industry.

PROJECTS

AMAZON CLONE INTERFACE

Github link: https://sandipkc145.github.io/amazonclone/

- Developed a user interface resembling Amazon's homepage using HTML and CSS.
- Focused on visually appealing layouts (not responsive).

RESPONSIVE STUDYING PLATFORM INTERFACE

Github link: https://sandipkc145.github.io/bootstrap/

- Designed a user-friendly studying platform interface using HTML, CSS, and Bootstrap.
- Ensured the platform is fully responsive and adaptable to different screen sizes for an optimal user experience.
